

DIONavi. Technically Superior yet Patient-Centered Implant Services

*Computer Aided 3D Simulations provide fast and
precise preparation*

*Minimally invasive techniques reduces bleeding
and inflammation*

*Postoperative recovery period is significantly reduced
when compared with conventional open flap surgery*

Traditional Implant Surgery

Results Rely Only on Clinical Experience and Techniques

DIONavi. Surgery

Results Are Highly Predictable and Consistent Using a Methodical Approach

DIONavi.'s minimally invasive procedure reduces drilling noise and results in little to no post-operative pain.

Dionavi. uses minimally invasive procedure without discomfort

Conventional procedure

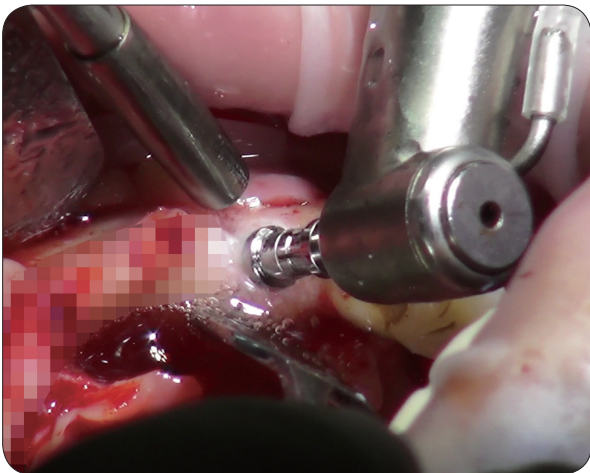

Dionavi.'s minimally Invasive procedure

DIONavi. is quiet and comfortable

Conventional procedure

**Dionavi.'s minimally
Invasive procedure**

DIONavi. is a durable and long-lasting solution

Conventional procedure

**Dionavi.'s minimally
Invasive procedure**

DIONavi. is a well-established surgical procedure protecting supporting bone against peri-implantitis

DIONavi. with 3D computer-aided
simulations provides fast, precise and
reliable treatment

Precise
Quick
Reliable
Cost Effective

DIONavi. is precise

DIONavi's 3D Computer-Aided Simulations make treatment significantly faster, easier and more precise allowing to

- optimize the placement of dental implants
- Identify trouble spots
- determine appropriate implant size and shape
- assess the precise orientation and position of teeth & implant

DIONavi. is quick & precise

Step1

Consulting, Patient Assessment, 3D CT Scan, Digital Intraoral Impression

Step2

Guided Implant Surgery : Safe, Predictable and Efficient

Step3

Crown Placement

The best
digital implant DIONavi.
for you
